

WEB FILE SHARING

Secure file sharing and storage for business.

Secure File Storage

Protect your files using a fully secure WFS portal. Share files securely with advanced encryption.

Easy Collaboration

Share files securely inside or outside your organization, plus control user access.

24/7 Online

Enjoy secure web access to your files anytime, anywhere using any device.

Store and share files securely with Web File Sharing for business.

Web File Sharing makes it easy to quickly share a ton of large files without relying on email, clunky file servers, or cloud services primarily designed for file sync.

Web File Sharing for Business is quick, simple, and powerful! You can password protect a library, set automatic expiration, and get email notifications when new files are added by your coworkers, or downloaded by your clients.

TOP FEATURES

- Unlimited Documents
- Unlimited Libraries
- Unlimited Recipients
- Unlimited Groups
- Secure Online Access

Built for the Modern Workplace

Web File Sharing makes team collaboration easy and secure without IT expertise.

File Storage - 100Gb of secure storage is available per user.

Large File Limit: Upload files up to 250Mb in size.

Monitoring: Receive alerts via email/text when unusual activity is discovered.

Data loss prevention: We ensure secure file storage across multiple networks.

Encryption: Uses 256-bit encryption for all data transfer sessions.

Reporting: Full Reports on all portal activity.

ExchangeDefender Web File Sharing simplifies collaboration, sharing, and management of large files, and folders via a secure, regulatory web service.
