

A Stronger ExchangeDefender 2018

We've spent the bulk of 2017 rewriting, re-engineering, and rethinking ExchangeDefender, and all of the services we provide. Here are some cool new features to get excited about.

Newsletter View: Get More Efficient with Email

Introducing ExchangeDefender **Newsletter View**: a feature that allows users to see newsletters and subscription content via the web library without the clutter in their mailbox.

Phishing Protection: Stay Safer Online

ExchangeDefender **Phishing protection** will warn users if there anything suspicious about the email before they open it. Dangerous links will be labeled and disarmed.

Spoofing Protection: Don't Get Scammed

Getting email delivered and keeping your domain from being used for SPAM is a difficult task as spammers become more sophisticated with social engineering. ExchangeDefender's new **Spoof Protection** feature will make those attack vectors a thing of the past.

Exchange 2016: The Latest & Greatest Email Technology

Exchange 2016 brings the latest tech from Microsoft to our clients. With the Outlook Web app improvements, the online experience rivals Outlook. Get ready for really large **50 GB** mailboxes.

Policy Engine

Organizations need a better way to implement messaging policies, and make sure sensitive information gets screened. ExchangeDefender **Policy Engine** add-on for Encryption will allow you to screen by keyword and by sender with the option of messages being sent, bounced, or forwarded for review.

VPN

Any device, connection, and network is susceptible to security exploits. In order to provide road warriors with a secure access to the ExchangeDefender network, we're rolling out a **VPN** service. Later in 2018, we'll extend the **VPN** to allow remote (non-ExchangeDefender) networks.

2 Factor Auth / One Time Passwords (2FA/OTP)

In order to help protect your clients that insist on the simplest password possible or use the same password everywhere, we're adding another layer of security through **two factor auth** with disposable one-time passwords.

Marketing Collateral

We have an enormous amount of training and **marketing collateral** that we use internally and for partner training, and now we're extending our expertise to you so that you can rely on us to build your business.
