EMAIL OUTAGE PROTECTION

Live Archive: Uninterrupted access to live and archive email.

Always On

Unlimited access to your email even during service interruptions.

Easy Setup

Set up the service in just minutes, no install required.

Mobile Friendly

24/7 access to your emails no matter where you go.

Access your email via the cloud even when outages happen.

Live Archive is an enterprise-grade email continuity service that lets you resume work after a service interruption, or other technical malfunction.

The best part of all is that LiveArchive is always-on, constantly archiving your sent and received mail for up to one year. No maintenance or management needed in case of an outage. LiveArchive is continuously uploading your mail whether your system is up or not.

TOP FEATURES

- Real-Time Archiving
- One Year Storage
- Secure Servers
- No Install / Downloads
- Secure Online Access

Benefits of Email Outage Protection

Explore key productivity features that keep your emails coming no matter what.

No Outage Productivity Issues

Have access to all your recent email and work in real time enabling you to continue sending, replying to, and forwarding any new email while your infrastructure is down.

No Training Required

LiveArchive is automatic - go to **https://livearchive.exchangedefefender.com** – login with your current email address and password, and there you'll see up to one year of your sent and received messages.

Accessible Anytime, Anywhere

Accessing your emails on-the-go is important to keep businesses running smoothly. Office internet connection down? Working from home or local Starbucks? Server down? With LiveArchive, don't miss a beat.
